

Naming Conventions

General Principles

- **Lowercase & Underscores:** Use lowercase letters and underscores (`_`) to separate words.
- **Avoid Reserved Words:** Do not use SQL reserved keywords as object names

Table Naming Conventions

Bronze Tables

Format: `<sourcesystem>_<entity>`

- Start with the source system name (e.g., `crm`, `erp`).
- Keep the original table name without renaming it.

Example: `crm_customer_info`

Silver Table

Format: `<sourcesystem>_<entity>`

- Start with the source system name (e.g., `crm`, `erp`).
- Keep the original table name without renaming it.

Example: `crm_customer_info`

Gold Tables

Format: `<category>_<entity>`

- Use meaningful, business-friendly names.
- Start with the table category.

Prefix	Meaning	Example
dim_	Dimension table	dim_customers
fact_	Fact table	fact_sales
report_	Report table	report_sales_monthly

Column Naming Conventions

Surrogate Keys

Format: <table_name>_key

Example: customer_key

Technical Columns

Format: dwh_<column_name>

Example: dwh_load_date

Stored Procedures

Format: load_<layer>

Examples:

- load_bronze
- load_silver
- load_gold
